

## OVER + OVER PLUS

The transplanting machine **OVER** can transplant on already mulched ground or on bare soil. This transplanting machine is versatile and so it is possible to plant square soil blocks, modules, bulbs and seeds. The peculiarity of this transplanting system is that it is not equipped with shares. The plant is bedded out through cups. The transplanting machine OVER can be coupled with the mulching machine to lay the film and to plant at the same time. The model OVER PLUS is a special model for distances between 32 and 50 cm between rows.

MOD.						PIANTE FILA					
OVER	∅ max 5 cm	1/6	140/220	min. 50	min. 21	2.800/3.000 / h	min. 50 HP	250/850	200/350	180	180
OVER S	(3x3 - 4x4 - 5x5) cm	3/6		min. 32
