

▪ *TRANSPLANTER*

TRANSPLANTER-TC

Semiautomatic with 12 cups rotating distributor

- **Use:** semiautomatic equipment for transplanting seedlings with a conical or pyramid-shaped root ball. All independent modules (from 1 to 6 transplant elements) are fed by 12 cups rotating distributor. Recommended for tobacco, tomato, cabbage, courgette, broccoli and other similar seedlings.
- **Adaptation to the ground and transplanting:** with parallelogram arm that keeps the equipment constantly adapted to the ground, always remaining parallel to the surface; with adjusting tie rod for manually adjusting the depth of the furrow; with a knob to regulate the quantity of soil to earth up around the root balls

- Inter-row (IF) adjustable minimum 45 cm (standard)
- Inter-plant (IP) adjustable minimum 12 cm.
- Approximate hourly production: around 4500 seedlings/hour per operator.

C = cm 2 ÷ 6	D = cm 4 ÷ 7	E = cm 8 ÷ 23	F = cm 12 ÷ 30

ACCESSORIES

- | | |
|-----------------------------------------------------|---------------------------------------------------|
| Watering system direct on seedling | Double seat with support plate and fixing support |
| Watering system at continuous flow on row | Row tracers (pair-manual type) |
| Water tank 330 L with fixing supports | Row tracers (pair- hydraulic type) |
| Hose carrier-layer with front fixing support | Tempered steel furrower |
| 3-point hitch with telescopic bar | Lister blade |
| Gears for additional transplant distances | Root ball separator |
| Rotating container holders with fixing supports (6) | Transversal container holder at 2 shelved |
| Adjustable microgranulator | Fertilizer spreader |
